

Zero Waste Furniture

We believe that quality is more important than quantity.

We are committed to providing our customers with the highest-quality, environmentally conscious designer furniture available. Our pieces are crafted in limited quantities, ensuring the utmost attention is paid to each and every detail. We firmly believe that quality should always take precedence over quantity, and our furniture is designed to stand the test of time. We use only the finest materials and sustainable production methods to create each piece, ensuring that our products are both stylish and environmentally responsible. Additionally, we offer custom-made pieces that are tailored to meet the specific needs of each customer.

We are dedicated to offering unique and environmentally conscious designer furniture, crafted in limited quantities.

We believe that quality is more important than quantity, and our pieces are designed to stand the test of time.

Each piece is made with care and attention to detail, using only the finest materials and sustainable production methods.

We offer custom-made pieces that are tailored to meet each customer's individual needs.

By choosing our shop, customers can be confident that they are investing in stylish and sustainable furniture that will enhance their home for years to come.

Impact on the Environment

As a responsible member of the furniture sector, we are committed to using sustainable materials and production methods to minimize our impact on the environment.

The production and disposal of furniture contribute to the destruction of natural habitats, soil erosion, and water pollution, which can have devastating effects on biodiversity.

By choosing our products, customers can feel confident that they are making a responsible choice for their home and the planet.

Having observed the furniture and interiors market closely for several years, I am disheartened by the enormity of the unnecessary waste that goes into it. Valuable, high-quality materials are senselessly discarded, causing significant damage to the environment. As a result, I have committed myself to introducing a sustainable approach to the use of materials in my environment. My goal is to create a better, healthier future for our children by creatively reusing manufactured materials.

With more than 12 years of experience as CEO of Xicorra Interior Design in furniture, interior, architecture and visual arts design, I have successfully completed more than a hundred commercial and private interior projects.

I am also the CEO of Nuwa Atelier. Our company specializes in creating aesthetic furniture that embodies the spirit of zero waste. Using sustainable materials and innovative design techniques, we strive to create pieces that not only look beautiful, but are also environmentally friendly.

I am passionate about bringing positive change to the furniture and interiors market. With my extensive experience and commitment to sustainability, I am confident that I am able to make a significant impact on the industry.

QUALITY

Longevity

Our mission is to create durable products that will last for years. Our products are made in small batches because we do not want to create an unnecessary inventory. Each product comes with instructions for care. We establish clear guidelines for using our products to maintain their quality for many years.

Tradition & Innovation

We use techniques passed down from generation to generation that have been in use for almost 100 years. In combination with modern technologies, we create personalized and eye-catching products.

PROCESS

Concept

The inspiration for creation is nature and the environment. Ideas often come by themselves thanks to many years of experience in the industry.

Production

In the production process, we use such machines as a modern CNC cutting machine, vertical and horizontal saws, a veneering machine, and an ecological paint booth.

Raw Material

We make every effort to ensure that semi-finished products come from reliable suppliers who care about the environment. They should be produced sustainably, using recycled or waste materials.

MATERIALS

Zero Waste

Projects such as PATCHWORK or CRAFT & ART are unique and individual works made from scraps of post-production materials. Creating from useless materials can be an ecological and aesthetic work of art.

Sustainability

We focus on sustainably produced or recycled materials. The most common materials we use are wood, metal, and solid surfaces. The materials have the appropriate quality certificates. We strive to use irreplaceable materials like metal and wood in a sustainable way in accordance with the zero waste concept. The latest technologies reduce the amount of waste generated in the production process.

ENVIRONMENT

Our Mission

Our brand was born out of respect for nature. Our planet is our home that we should take care of especially in the present time. Production takes place in Poland, while the raw materials are produced in the EU, which reduces the carbon footprint.

Cooperation with proven manufacturers allows us to have control over the quality of materials. Long-term relationships allow us to create multidimensional projects.

Packaging

We strive to eliminate plastic from our collateral. Cardboard boxes are recycled, and paper items such as instructions are printed on recycled paper.

MAINTENANCE

Wood

Any wooden furniture requires care, as over time its top layer will wear off. For this purpose, we recommend natural products such as oils or waxes.

Solid surface

The most important rule for using a solid surface is to protect it from heat exposure. Contact with something hot can cause damage to the surface.

Metal

We do not recommend the use of highly corrosive chemicals as they may damage the surface.

Nuwa Products

We are thrilled to have the opportunity to showcase our exclusive products to you with utmost delight. We eagerly anticipate sharing our distinct products with you and hope you will find them as remarkable as we do.

HANDFAN

A standing LED lamp doesn't have to be boring. Countless compositions and choices of materials. Lamps with their shape refer to handfans. Made of recycled HPL and high-quality veneer.

You can use our composition base or create a fully personalized lamp.

If you want to create your own composition by choosing the material, colors of the fans, and the height and color of the lamp base, you can contact us.

CLOUD

Coffee table in an unobvious modern form. Soft, streamlined shapes will fit into any interior. Recycled metal and HPL were used for the leg. Thanks to a wide range of colors, the table will become a decoration of various interiors.

The proposed powder-coated leg can be lacquered in different colors. The composition of the table tops can be changed freely, we are in possession of other colors for more details please contact us.

ROUND

Small auxiliary tables with a round top. Top created from leftover hpl and veneer materials. The proposed powder-coated leg and overlays can be lacquered in different colors.

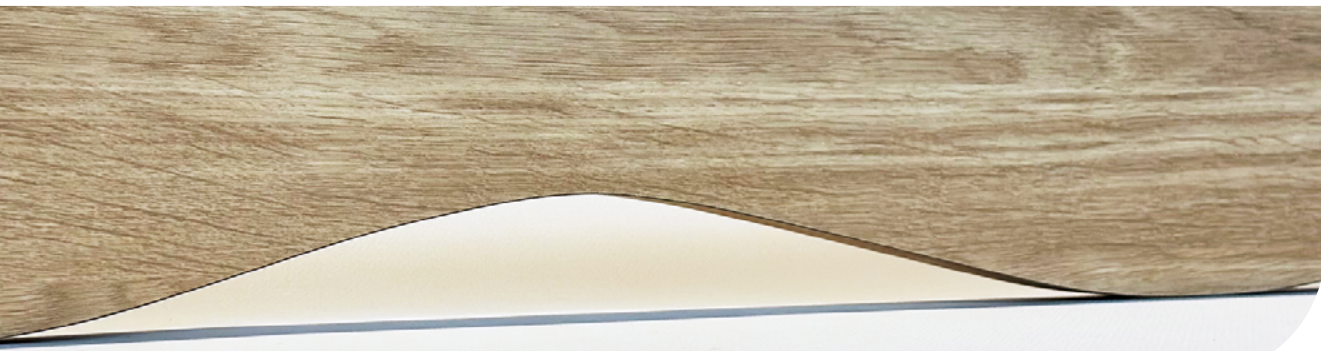

The composition of the table tops can be changed freely, we are in possession of other colors for more details please contact us.

WAVE

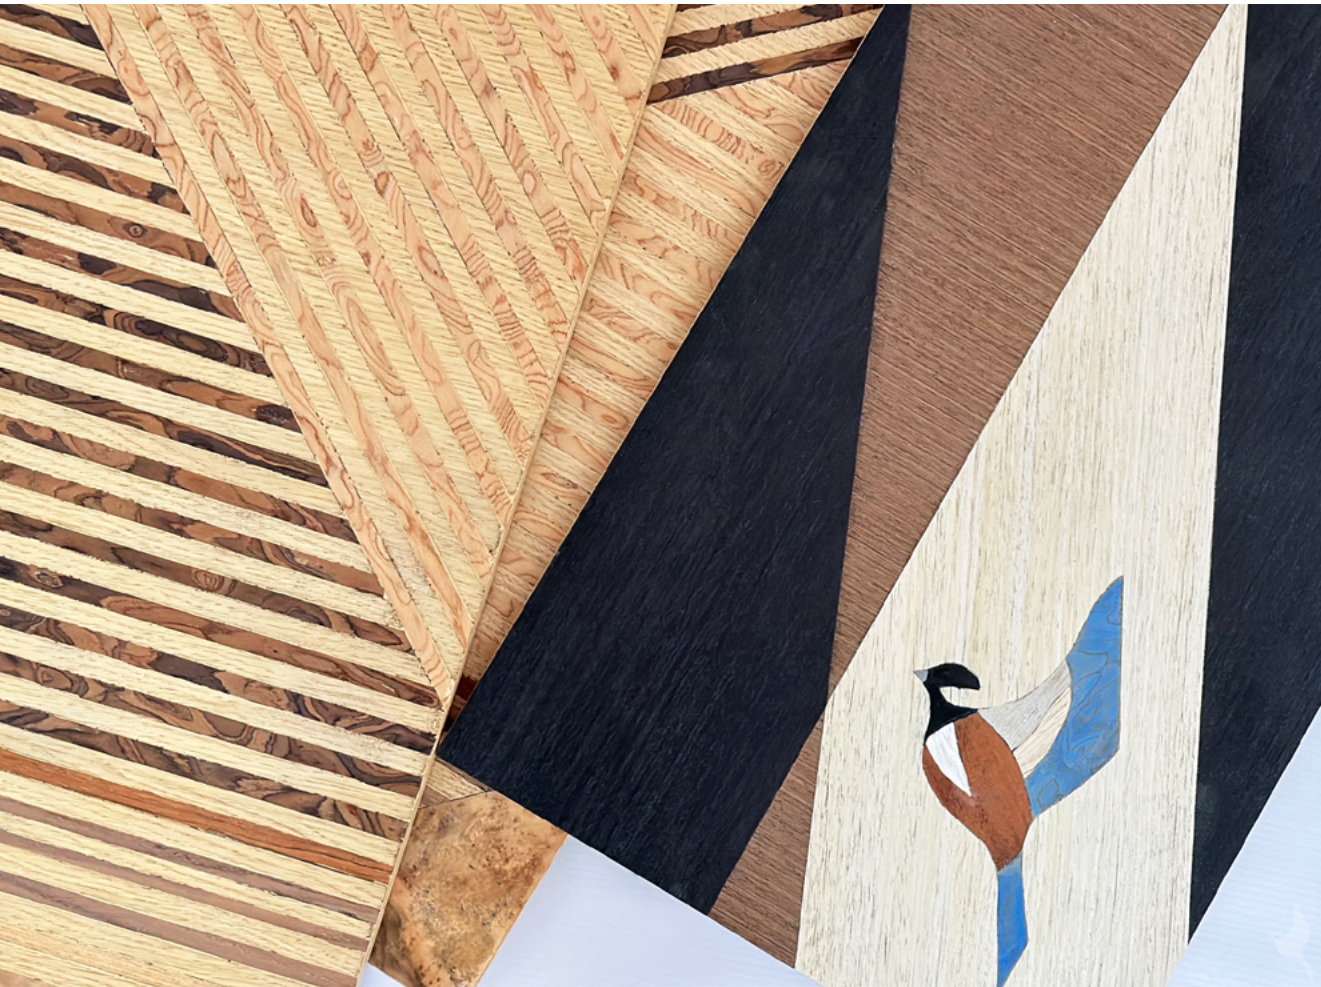

The minimalist delicate form of the led lamp will blend into any interior. Its appearance is reminiscent of a wave, giving it a unique character. This lamp is perfect for illuminating a living room, bedroom, or dining room, creating a pleasant and warm atmosphere in any space.

Available in two versions with more or less diffused light. The lamp is made of recycled HPL. If you want the lamp in a different color range or size, please contact us.

ART & CRAFT

These wooden panels are made from high-quality veneer leftover scraps, and carefully crafted to create unique and beautiful fronts for cabinets. Each panel has its own distinct pattern, texture, and color, making them one-of-a-kind pieces of art.

We can create a personalized marquetry design on a panel according to your idea or project.

If you want panels in a different color range, pattern or size, please contact us.

PATCHWORK

Our patchwork tabletops are made from leftover pieces of solid surface, available in two different shapes. In addition to the unique design, you have the option to include a personalized logo on the tabletop.

If you need table legs we offer the option to purchase compatible legs.

If you want tops in a different color range, pattern or size, please contact us.

SHAPE OF STEEL

The table is a unique and eye-catching piece of furniture. It is made from a combination of solid steel and natural wood, giving it a modern and industrial aesthetic. The table's base consists of two abstract, geometric steel shapes that are welded together to form a stable and sturdy foundation.

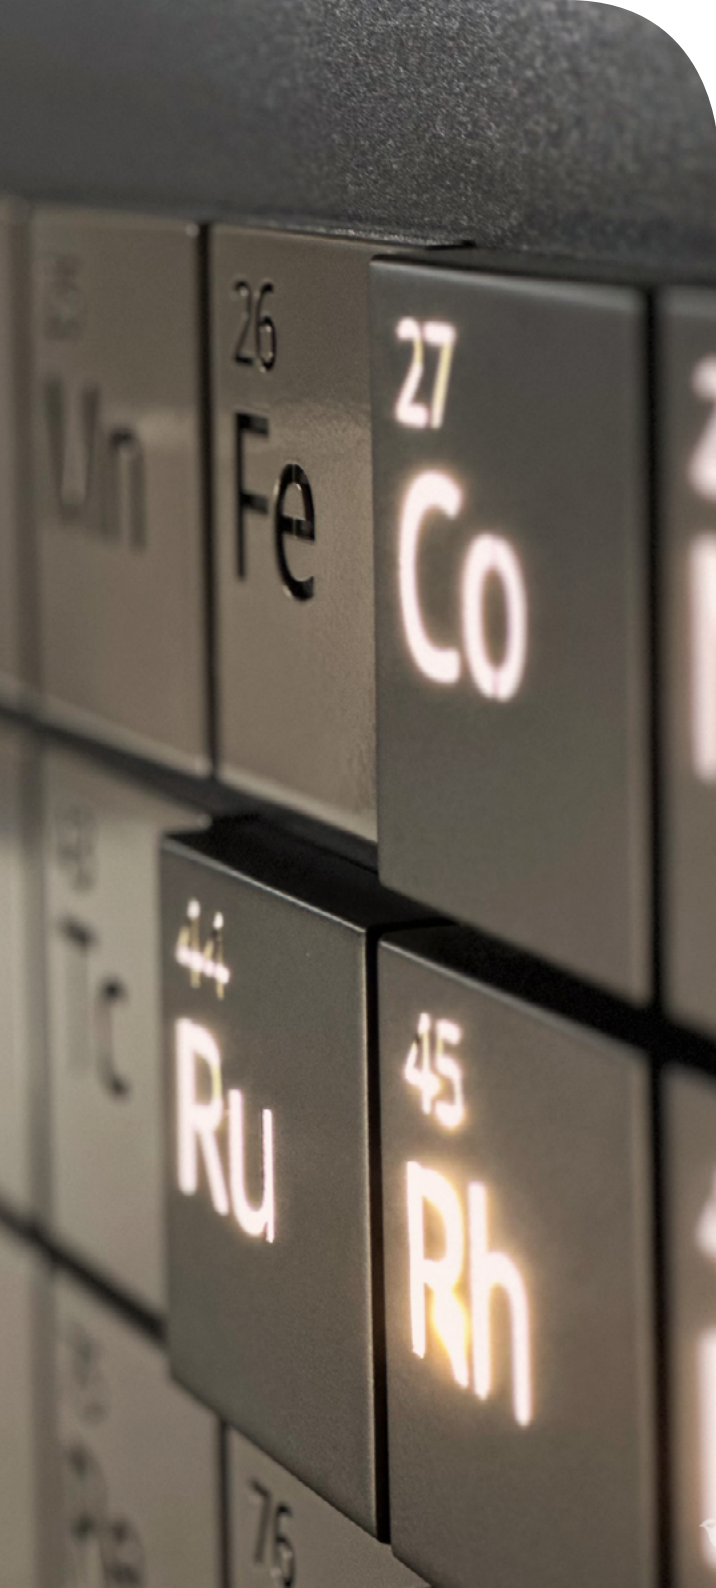

The base is powder-coated in a silver finish, which gives them a sleek and sophisticated look. If you want legs in a different color, please contact us.

PERIODIC TABLE

The desk's surface is made from HPL, which is durable and easy to clean. The desk also has a built-in counter, which is ideal for signing visitors or placing documents. The counter is made of sturdy construction and finished in a matching matte black powder coat.

It's a functional and original piece of furniture that will be a great addition to any modern office space. It is both durable and stylish, making it a great investment for any business or professional setting.
